

SageMaker Analysis Report

We report the following SageMaker analysis.

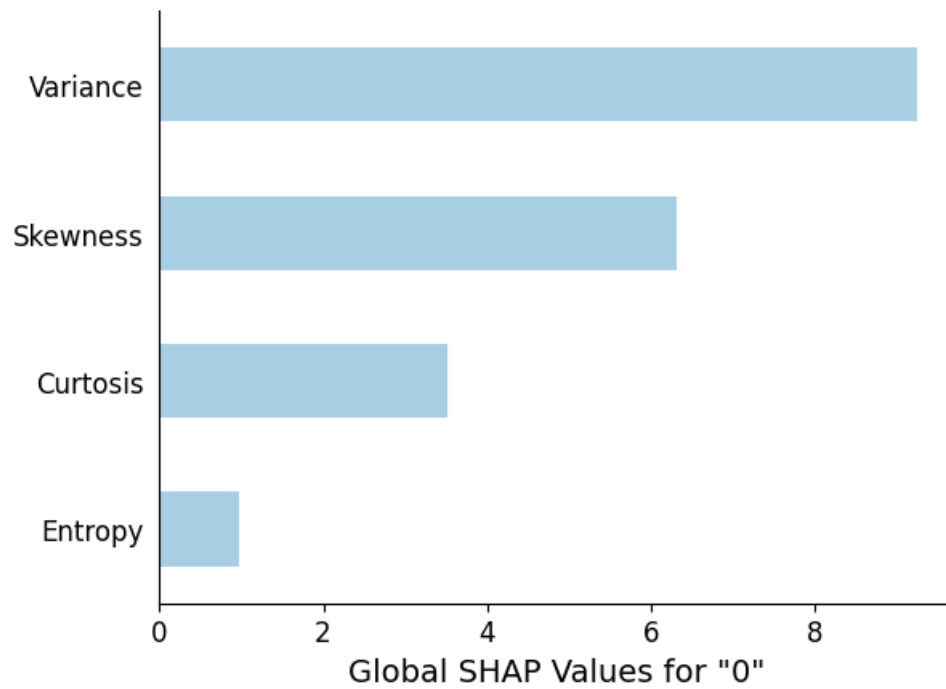

Explanations for all labels

The Model has 4 input features and 2 output labels. We computed KernelShap on the dataset and display the 10 features with the greatest feature attribution summed up over all the labels.

Explanations for "0"

The Model has 4 input features. We computed KernelShap on the dataset dataset and display the 10 features with the greatest feature attribution.

Explanations for "1"

The Model has 4 input features. We computed KernelShap on the dataset `dataset` and display the 10 features with the greatest feature attribution.
